PBA Cylinder Lockers

FOR COMPRESSED GAS

The no rust easy solution for safely moving LPG and compressed gas cylinders!

The "no rust" solution to safely securing LPG and compressed gas cylinders!

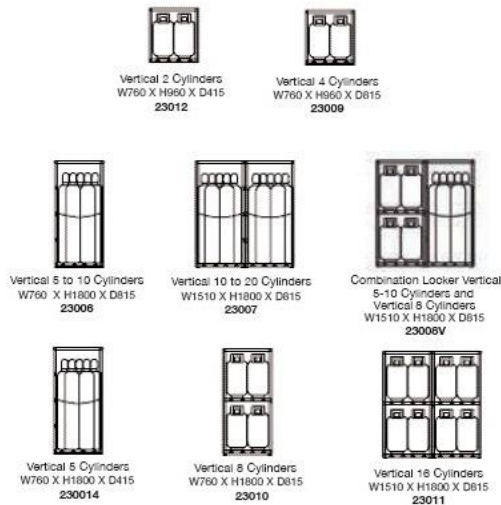

Gives an organised look to expanded multi-locker storage.

23007

- * Sloped roof design sheds water and ice. Solid top reinforces stability.
- * Comes complete with warning and full empty cylinder labels.
- * Extruded 3 mm thick, heavy aluminum framework provides superior strength.
- * Heavy, expanded, 7 mm thick aluminum mesh panels and all welded construction resist abusive outdoor elements - won't rust or discolor.
- * Padlock lug for security.
- * Aluminum's long lasting durability keeps your gas cylinders safe and your property looking clean.
- * Ships fully assembled to save on set-up time.
- * Weighs 66% lighter than steel - costs less to ship and easier to position.
- * A pre-drilled hole at each corner accepts 12 mm anchor bolts for maximum security and stability.
- * Cylinders stay clear of ground with strong floor plate on vertical storage locker.

11 Modular styles to choose from!

Cylinder Lockers from PBA offer superior features that make these units extremely durable and easy-to-use.

Constructed of 100% welded aluminum — they will not rust, corrode or discolor. PBA's expanded 7 mm thick metal panels are the strongest in the industry — offering additional resistance to tampering.

Welded security lug on front panel door accepts a padlock (not included) for extra security. Heavier gauge aluminum mesh and extruded (not bent) frame add rigidity. All models have an exclusive solid aluminum roof panel that slants toward the back to shed water and ice. Eleven modular styles provide an efficient, attractive solution to expanded, multi-cabinet storage.
